SUMMARY

Passionate and dedicated web developer with strong expertise in the MERN stack. Builds responsive, clean, and user-friendly applications with a focus on performance and modern design. Actively explores AI tools and technologies to stay ahead in the evolving tech landscape, with a continuous learning mindset.

PROJECT

Employee Task Management System (ETMS)

<https://github.com/sushil-thakur/Employee-Management-System>

- Developed a role-based task management system using PHP and MySQL with separate panels for Admins and Employees.
- Implemented features for employee CRUD operations, task creation and assignment, salary management, and status tracking.
- Designed secure user authentication with password reset functionality and session-based access control.
- Built real-time notification and activity tracking systems for employee task updates.
- Organized the project with modular PHP scripts (e.g., add_task.php, manage_tasks.php, notifications.php) for maintainability.
- **Technologies Used:** PHP, MySQL, HTML, CSS, JavaScript, Bootstrap.

Mental Well-being Hub

<http://mentalhealthas.netlify.app/>

- Developed a user-friendly and accessible website using HTML, CSS, and JavaScript to promote mental health awareness and provide valuable resources.
- Designed and implemented various sections, including articles on mental health, a blog for personal narratives, and resources for connecting with professionals.
- Integrated an interactive chatbot for real-time guidance, FAQs, and further support links.
- Crafted a calming and empathetic user experience with a soothing color palette and intuitive layout to ensure a welcoming atmosphere.
- **Technologies Used:** HTML, CSS, JavaScript.

Food Factory – Full-Stack Food Delivery

<https://foof-del-backend.onrender.com>

<https://foof-del-admin.onrender.com>

<https://foof-del-frontend.onrender.com>

- Developed a responsive full-stack food delivery platform using React.js, Node.js, Express, and MongoDB with Stripe integration for secure NPR-based payments and real-time order tracking.
- Implemented robust user and admin modules featuring JWT authentication, food item management, image uploads (Multer), order processing, and live status updates.
- Enhanced performance and usability via Vite-powered builds, Context API for global state management, and RESTful API integration with Axios
- **Technologies Used:** React.js, Node.js, MongoDB

EDUCATION

Bachelor of Computer Science (Hons.)

August 2022 - Present

TRAINING

MERN STACK

BOARDWAY infosys

17th Feb, 2025

SKILLS

Technical Skill :HTML, CSS, JavaScript, React.js, TypeScript, ReactNative, Node.js, Express.js, MongoDB, ML ,Figma

Soft Skill: Good time management,Eager to learn new technologies, Hard Work and Adaptable
